

VIOLENT CRIMES

Violent crimes in Houston increased less than 1 percent in 2008 compared with 2007.

Homicides dropped by 16 percent.

The number of homicides dropped from 353 in 2007 to 295 last year.

Sexual assaults increased more than 8 percent from 2007.

Aggravated assaults increased at 9.1 percent.

DOMESTIC VIOLENCE

Of the 1,092 additional aggravated assault cases in 2008, more than half were reports of domestic violence.

NONVIOLENT CRIMES

Nonviolent crimes declined more than 10 percent in 2008.

Property dropped by more than 10 percent.

Auto thefts decreased last year, dropping more than 21 percent to 15,214, down from 19,465 in 2007.

The bills that I authored are intended to make America a better, fairer place, and are intended to assist families and the incarcerated. They are smart bills that are aimed at making America a safer place and are aimed at lessening the expense of warehousing prisoners and the indiscriminate locking up of prisoners. I urge my colleagues to support this resolution and the bills that I sponsored.

EXTENDING CERTAIN
IMMIGRATION PROGRAMS

SPEECH OF

HON. ROBERT J. WITTMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 4, 2009

Mr. WITTMAN. Mr. Speaker, the House's consideration of H.R. 1127, legislation to extend certain visas for religious workers and doctors serving in underserved areas highlights our broken immigration and visa system.

While R-1 visas and the Conrad 30 J waivers are noble programs there are many small businesses in my congressional district that face critical shortages of workers because Congress has failed to address the H-2B temporary worker visa program.

Without prompt action by Congress to extend H-2B visa cap relief, employers who rely on temporary and seasonal employees face severe worker shortages and the looming possibility of business closures in 2009.

Workers with H-2B visas provide necessary labor for the seafood, tourism, hospitality, and landscape industries, as well as many other temporary and non-agricultural jobs in this country. Due to the seasonal nature of the work and the structure of the cap, employers often face uncertainty and employment shortages during their busiest season.

I urge you to take action to quickly pass the Save Our Small and Seasonal Business Act of 2009. H.R. 1136 would address this important issue impacting many businesses in my district and across the country. Your leadership in this matter is critical in assuring that small and seasonal business will be able to successfully navigate the challenging times facing our economy.

HELPING FAMILIES SAVE THEIR
HOMES ACT OF 2009

SPEECH OF

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 26, 2009

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 1106) to prevent mortgage foreclosures and enhance mortgage credit availability:

Mr. DINGELL. Mr. Chair, I rise today in support of H.R. 1106, the "Helping Families Save Their Homes Act of 2009." We are in the midst of the gravest recession in recent memory and hear daily of countless foreclosures across the Nation, particularly in my home state of Michigan. As President Obama mentioned during his address to the Congress last week, the federal government can and must pursue measures to mitigate the effects of this terrible economic blight upon the Nation's citizens.

With the painful memories of the Great Depression still clearly in mind, I offer my wholehearted praise and support for the President's call to action. Additionally, as the representative of a congressional district with one of the Nation's highest foreclosure rates and most dramatic decline in housing values, I feel it imperative that we move swiftly to stabilize the housing market to keep people in their homes.

H.R. 1106's provisions will do much toward achieving this goal. Its improvements to the Hope for Homeowners program and provision for a safe harbor to mortgage servicers that elect to participate in mortgage modifications will help stem the tide of foreclosures sweeping across the country. The bill's provision to make permanent the increase in federal deposit insurance from \$100,000 to \$250,000 will give Americans greater faith in the safety of their savings at a time of continued bank failures.

I extend my heartfelt congratulations to my colleagues, Representatives LOFGREN, TAUSCHER, and CARDOZA, for their work to narrow the authority in this bill afforded to bankruptcy judges to modify the terms of a loan for primary residences. I believe that in keeping with the President's housing plan, we should adopt a targeted effort at stemming foreclosures to address the housing crisis.

I urge my colleagues to support this legislation.

I MUST SAVE MY CHILD

HON. ED PERLMUTTER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 5, 2009

Mr. PERLMUTTER. Madam Speaker, I submit the following for the RECORD.

[From Parade, Feb. 15, 2009]

I MUST SAVE MY CHILD

(By Melissa Fay Greene)

WHEN SUSAN AXELROD tells the story of her daughter, she begins like most parents of children with epilepsy: The baby was adorable, healthy, perfect. Lauren arrived in June 1981, a treasured first-born. Susan Landau had married David Axelrod in 1979, and

they lived in Chicago, where Susan pursued an MBA at the University of Chicago and David worked as a political reporter for the Chicago Tribune. (He later would become chief strategist for Barack Obama's Presidential campaign and now is a senior White House adviser.) They were busy and happy. Susan attended classes while her mother babysat. Then, when Lauren was 7 months old, their lives changed overnight.

"She had a cold," Susan tells me as we huddle in the warmth of a coffee shop in Washington, D.C., on a day of sleet and rain. Susan is 55, fine-boned, lovely, and fit. She has light-blue eyes, a runner's tan, and a casual fall of silver and ash-blond hair. When her voice trembles or tears threaten, she lifts her chin and pushes on.

"The baby was so congested, it was impossible for her to sleep. Our pediatrician said to give her one-quarter of an adult dose of a cold medication, and it knocked her out immediately. I didn't hear from Lauren the rest of the night. In the morning, I found her gray and limp in her crib. I thought she was dead.

"In shock, I picked her up, and she went into a seizure—arms extended, eyes rolling back in her head. I realized she'd most likely been having seizures all night long. I phoned my mother and cried, 'This is normal, right? Babies do this?' She said, 'No, they don't'."

The Axelrods raced Lauren to the hospital. They stayed for a month, entering a parallel universe of sleeplessness and despair under fluorescent lights. No medicine relieved the baby. She interacted with her parents one moment, bright-eyed and friendly, only to be grabbed away from them the next, shaken by inner storms, starting and stiffening, hands clenched and eyes rolling. Unable to stop Lauren's seizures, doctors sent the family home.

The Axelrods didn't know anything about epilepsy. They didn't know that seizures were the body's manifestation of abnormal electrical activity in the brain or that the excessive neuronal activity could cause brain damage. They didn't know that two-thirds of those diagnosed with epilepsy had seizures defined as "idiopathic," of unexplained origin, as would be the case with Lauren. They didn't know that a person could, on rare occasions, die from a seizure. They didn't know that, for about half of sufferers, no drugs could halt the seizures or that, if they did, the side effects were often brutal. This mysterious disorder attacked 50 million people worldwide yet attracted little public attention or research funding. No one spoke to the Axelrods of the remotest chance of a cure.

AT HOME, LIFE SHAKILY returned to a new normal, interrupted by Lauren's convulsions and hospitalizations. Exhausted, Susan fought on toward her MBA; David became a political consultant. Money was tight and medical bills stacked up, but the Axelrods had hope. Wouldn't the doctors find the right drugs or procedures? "We thought maybe it was a passing thing," David says. "We didn't realize that this would define her whole life, that she would have thousands of these afterward, that they would eat away at her brain."

"I had a class one night, I was late, there was an important test," Susan recalls. "I'd been sitting by Lauren at the hospital. When she fell asleep, I left to run to class. I got as far as the double doors into the parking lot when it hit me: 'What are you doing?'" She returned to her baby's bedside. From then on, though she would continue to build her family (the Axelrods also have two sons) and support her husband's career, Susan's chief role in life would be to keep Lauren alive and functioning.

THE LITTLE GIRL WAS AT RISK OF falling, of drowning in the bathtub, of dying of
