April 16, 2008

Chairwoman Zoe Lofgren
Ranking Member Steve King
House Subcommittee on Immigration, Citizenship, Refugees, Border Security, and
International Law
U.S. House of Representatives
Washington, DC 20515

Dear Chairwoman Lofgren and Ranking Member King:

As representatives of tens of thousands of seasonal employers throughout the country, we urge you to support H.R. 1843, the "Save Our Small and Seasonal Business Act of 2007."

This bipartisan bill would simply renew the highly successful relief provision for the H-2B visa program that was initially approved by the Senate by 94-6 in 2005. This provision recognizes the reliability and trustworthiness of past participants in the H-2B program by exempting those temporary seasonal workers who have participated in the H-2B visa program and have completely followed the law during the past three fiscal years from counting toward the statutory cap.

The congressionally mandated 66,000 annual cap on the number of workers allowed to participate in the program that was established in 1990 does not reflect current economic realities or meet the needs of businesses which are seasonal or have peak load needs that rely on these workers.

Before employers can hire temporary seasonal workers under the program, they must advertise their job openings, work with local unemployment offices to identify potential American workers and offer the positions to any qualified domestic applicants. The jobs these guest workers fill do not take jobs away from Americans. It is not until employers have carried out this time consuming and expensive due diligence in trying to hire American workers that they are allowed to petition the federal government for a labor certification and ultimately bring in temporary workers – their final option to run their seasonal businesses.

In fiscal year 2004, the statutory cap was reached on March 9 – only six months into the fiscal year and before many summer employers had an opportunity to apply for seasonal workers. As a result, many of these businesses had to cancel events, operate at partial capacity, not open parts of their businesses, or have their full-time staff work overtime to the point of burnout.

Each subsequent year, the cap has been reached sooner as a result of the increased need for seasonal workers and an increasing labor shortage. The cap for the first half of fiscal year 2008 was reached on September 27 – 3 days before the fiscal year even began and the cap for the second half of the year was met 4 MONTHS before the second half of the fiscal year began.

Without immediate action by Congress, widespread economic consequences will severely impact diverse economic sectors throughout the country including lodging, restaurants, landscaping, clubs, amusement parks, ski resorts, food processing, stone, travel and tourism, horse sports, construction, entertainment, hospitality, recreation and many other seasonal industries.

On behalf of thousands of small businesses and seasonal employers throughout the country, we urge you to support H.R. 1843 and secure its immediate passage.

Sincerely,

(continued)
