

# H-2B Workforce Coalition

---

P.O. Box 14188; Washington, DC 20044

phone:(202) 6894358

Dear Senator Mikulski:

Employers and communities across the country thank you for your steadfast leadership in addressing a major business issue for small and seasonal employers—the need for reliable access to short-term legal workers who augment our domestic workforce during peak seasons. Your ability to guide the “Save Our Small and Seasonal Businesses Act of 2005” (SOSSBA) last year gave employers in Maryland and elsewhere the life support they needed to stay in business and keep full-time Americans working. However, the Act’s exemption for qualified returning workers will expire on September 30, 2006.

IF SOSSBA is not retained, many businesses will face certain devastation because—

- 1) Extensive recruitment by businesses fails to attract an adequate number of American workers to fill temporary seasonal employment opportunities, often in remote locations. The recruitment process, wages offered, and number of employees required are certified by the Labor Department.
- 2) The federal government has stopped accepting applications for new H-2B workers four months prior to end of the first-half of the Fiscal Year 2006. It is anticipated that the cap for the second-half of the fiscal year will be hit in even less time. This marks the third consecutive year that the H-2B has been prematurely exhausted. Prior to exempting returning H-2B workers, the overly restrictive cap resulted in businesses being prevented from operating at full, and even caused some to permanently going out of business.
- 3) The H-2B visa program is the only option for employers with short-term employment needs when no Americans can be found. Without access to this program, there are no other available legal options. Adequate access to the H-2B program means security checks for seasonal guest workers, certification that no American workers are available and wages are protected, and requires that the temporary workers return home after the season.
- 4) Unless businesses with peak season needs can count on a stable short-term workforce, they cannot ensure job security for their full-time, year-round American employees. By retaining the return worker exemption, employers will be able to keep their doors open and operate at full capacity, thus keeping employees working and honoring contracts and commitments.

The H-2B visa program is an integral portion of the business model of seasonal industries like crabbing, travel and tourism, hospitality, food processing, restaurant, snow removal, fishing, entertainment and minor league sports, landscaping, forestry, recreation, roofing, stone, construction, and horse racing. **The undersigned businesses and organizations respectfully urge you to sponsor new legislation that will retain the current exemption for qualified returning workers.** Retaining the exemption will help to ensure the uninterrupted availability of legal, non-immigrant workers to small and seasonal businesses in Maryland and across the nation.

Thank you for consideration of our request.

Sincerely,

### **National and Regional Supporters**
